## It's No Wonder that People Rave about Results from Including Sun Chlorella as Part of a Healthy Lifestyle

This all-natural "wonder food" promotes health and vitality in 3 powerful ways: **NOURISHES:** Chlorella is loaded with protein, vitamins, minerals, and unique amino acids. The protein keeps you feeling full – so cravings for unhealthy food are less likely to creep in. It also has the highest nucleic acid content of any food, to help repair and protect damaged cells. And it has the highest amount of chlorophyll of any food. It helps calm the digestive tract and oxygenates the blood to build up your energy.

**DETOXIFIES:** Chlorella promotes the body's natural elimination processes by supporting your body's ability to clean away waste from your digestive system. This helps your body burn fat and release excess fluids, which is critical to maintaining a healthy weight. It also latches on to toxins that impact the health of your brain, joints, and cardiovascular system. Then chlorella safely escorts them out of your body.

**REVITALIZES:** Chlorella contains the unique Chlorella growth factor (CGF), a remarkably beneficial substance scientists have not found in any other food. This nutritional powerhouse helps your body produce healthy new cells. When it comes to bioavailability, all chlorellas are NOT created equal. It's critical to choose a chlorella that will help maximize your body's ability to absorb and use its vital nutrients – what's known as "bioavailability". Sun Chlorella's exclusive, patented DYNOC<sup>®</sup>-Mill process pulverizes the chlorella's tough outer cell wall to give you TWICE the nutrient value of regular chlorella. In fact, a whopping 80%+ of the chlorella in Sun Chlorella is absorbed by your body. You simply can't get a chlorella that's more potent or bioavailable. Sun Chlorella is the best way to maximize your health benefits and your value.
